PRO-MAX Anti-Fog Glasses

Brought To You by PRO-SAFE | Jun 02, 2020

PRO-SAFE offers extreme anti-fog glasses for extreme conditions. The PRO-MAX coating provides 6x greater anti-fog performance when compared to standard anti-fog styles. In extreme fogging conditions, PRO-MAX remains clear or fogs for no more than 10 seconds, while current industry anti-fog offerings take 60 seconds or longer to dissipate.

Some popular applications include construction, metalworking, grinding, milling, forestry and engineering. To learn more about the different options available, click here for a downloadable *PDF*.

Browse MSCDirect.com for PRO-SAFE's complete line of anti-fog safety glasses.
