Video: One Step Weld Blending & Grinding with Norton XHD Discs

Brought To You by Norton Abrasives | Oct 06, 2020

With the Norton RapidPrep XHD abrasive discs, removing weld lines, weld splatter, and weld discoloration and blending surfaces takes just a single step.

Norton's RapidPrep XHD discs are constructed with:

- Combined conformable fiber matrix and premium cermaic grain for improved cut control and surface blending
- Blended fiber web to dissipate workpiece debris
- Norton Clean Bond® resin system for smear-free finish and controlled wear rate

All of this translates to a disc with superior product life and shape integrity that can be used dry or with coolants. Watch the short video above to see how you can reduce application steps.
