

Personal Protective Equipment

VIDEO: Fabric Breakdown—Do You Know the Difference in PPE Fabrics?

Brought To You by DuPont | Nov 03, 2020

When DuPont asks their customers what types of protective garments they are wearing, they often hear back, “the white ones.” Did you know, that could mean a variety of different types of fabric with varying protective properties? In the short video above, Dan Bowen, Technical Specialist at DuPont Personal Protection, breaks down the difference between spunbond meltblown spunbond (SMS), microporous film (MPF) and Tyvek®.
