Video: Protect Employees: 5 Tips for Disinfecting Work Facilities

| Jan 20, 2021

Video Highlights

- Create rigorous sanitation schedules to stay on top of what needs to be cleaned and what needs to be disinfected, and how often to do both.
- Stocking the correct cleaning products, sanitizers and personal protective equipment for your specific applications is essential.
- Train your workforce to understand what your cleaning products do, when to use them and any risks associated with them.
- Review personal protective equipment needs to determine if what you have on hand complies with new or enhanced cleaning protocols.
- Make establishing cleaning and sanitizing procedures an ongoing process, and stay on top of the latest information and guidelines.

Enacting enhanced cleaning and sanitizing protocols is critical to keeping your workforce safe during COVID-19.

You can help protect employees by stocking the right cleaning supplies and PPE, training your workforce, creating sanitation schedules and keeping up with recommendations from experts for your specific industry and operations.

You can also rethink office layouts and empower employees to limit social interactions.

Let's Talk!

Got questions? Want to share any cleaning and sanitizing tips that worked for you? Now is your chance.
