VIDEO: HPX Drill–Solid Carbide Drill for Steels

Brought To You by Kennametal | Feb 01, 2021

Kennametal's *HPX* solid carbide drill for steels features a straight cutting edge that reduces build-up and chipping on the cutting edge and margin land. The patented HPX point provides excellent self-centering capabilities, reduces thrust, and enables precise center chip formation. See it in action in the short video above.

To learn more about the HPX solid carbide drill, read: Kennametal Introduces the HPX Solid Carbide Drill
