VIDEO: Norton MeshPower–Automotive Refinishing with Minimal Sanding Dust

Brought To You by Norton Abrasives | May 18, 2021

Video Highlights

The MeshPower Advantage:

- Out-performs competitive mesh abrasive products
- Mesh backing for optimum dust extraction
- Norton No-Fil technology prevents clogging and helps create a consistent cut
- Self-grip hook and loop backing with no designated hole pattern
- Open structure and premium resin bond system allows the product to be used wet or dry

Sanding oftentimes can be dusty and messy. With MeshPower sanding discs, Norton has created a product that provides virtually dust-free sanding; meaning a cleaner and healthier working environment, a better finish and a much more comfortable sanding experience.

MeshPower discs are a multi-functional abrasive, designed with thousands of holes, created by the unique open mesh backing. This mesh structure allows for powerful and effective dust extraction in any application. See how Norton MeshPower sanding products contribute to a cleaner and safer work environment while providing the ultimate material removal in the short video above.
