VIDEO: Making Chips, not Conversation—Harvi I TE Non-Stop Action

Brought To You by Kennametal | Jun 15, 2021

Maximum metal removal. Maximum productivity. Maximum benefit. **HARVI™ I TE** features an innovative proprietary design that drives maximum productivity. Its design provides a universal character; machining steel, stainless steel, cast iron, and high-temperature alloys with exceptional feed rates, reaching unmatched metal removal rates. Applicable for a variety of operations, including dynamic milling and extreme ramping operations. *See it in action in the short video above (no transcript).*
