VIDEO: Machining Two Materials Simultaneously With The New Tangential Shoulder Mill: Mill 4™-12KT

Brought To You by Kennametal | Jul 27, 2021

This tangential shoulder mill from Kennametal, the **Mill 4™-12KT**, can cut multiple materials at the same time. Watch the Mill 4™-12KT in action now in the short video above. The Mill 4™-12KT requires up to 15% less horsepower, enabling increased feed rates even on small machines. The patented insert design—featuring a triangular shaped margin—provides unprecedented stability in steel and cast-iron applications. Excellent floor finishes due to minimal axial runout. With seven grades, seven corner radii, and depth-of-cut range up to .472" (12mm), the program offers versatility to cover many shoulder milling applications.
