VIDEO: TOOLING UP – 3 Must-Know Pre-Machining Process Steps

Brought To You by Haimer | Oct 05, 2021

Video Highlights

Tooling Up is a video series by MSC Industrial Supply Company that provides real-world insights brought to you by leading industry experts and aimed at improving the efficiency and productivity of your operations.

Through Tooling Up, you'll gain access to our knowledgeable in-house specialists and experts from our most-trusted partners and suppliers, along with some exclusive innovative offerings from MSC. From metalworking and MRO supplies, services, and expertise to inventory management solutions, and to the safety and well-being of your team, we are dedicated to working side by side with you to make your operations better.

Explore more Tooling Up videos here.

In this episode of MSC's Tooling Up Eddie Saunders Jr., MSC Expert Host, is joined by Rob Salley, Application Engineer at Haimer for a real-time discussion on the pre-machining process and what you should consider in order to optimize your setup and increase productivity.

They'll cover an array of important topics including:

- What Shrink Fitting is and what the benefits of use are
- An overview of Presetting and the biggest user misconceptions
- Productivity gains from Balancing your machine setups
