VIDEO: HY-PRO CARB VGM: High-Efficiency Milling

Brought To You by OSG | Jun 01, 2022

With variable index and unique flute geometry, the *OSG HY-PRO® CARB VGM series* features unequal flute spacing which reduces vibration during machining by altering the timing of each flute engaging in the workpiece. In addition, a sharp rake angle, high helix and adjusted core diameter maintains excellent cutting edge sharpness and tool rigidity to promote smooth, stable cutting with low cutting force. See how it performed for several OSG customers in the short video above.
