VIDEO: KSEM PLUS™ – Modular Drill for Large Diameters

Brought To You by Kennametal | Feb 01, 2022

Quick tool set-up and minimal tool inventory. **KSEM PLUS™** is a versatile solution that combines the advantages of a modular drill and an indexable drill, providing high speed and feed capability with large length-to-diameter ratio at low consumable cost.

The KSEM PLUS modular drill covers drilling applications in a diameter range from 28mm to 101,6mm (1.102-4") up to 10 x D. Interchangeable head styles with two fully effective cutting edges deliver excellent productivity in all cutting conditions and many materials:

- The KSEM PLUS A1 head for lowest cost per hole.
- The KSEM PLUS B1 head for challenging conditions like stacked plates, cross holes, and inclined exits.
