VIDEO: Mitutoyo AI Inspect – Next Generation Defect Detection

Brought To You by Mitutoyo | May 02, 2022

Mitutoyo has long been a worldwide leader in precision measuring instruments and solutions. Because they are committed to helping you achieve 100% defect-free products, they used artificial intelligence to develop a simple method for the complex problem of defect detection. Mitutoyo AI Inspect is a standalone software product. It is designed to provide customers with a next generation visual AI-based image defect analysis system. AI Inspect features an intuitive interface with exceptional data visualization. There is no need for prior AI or data science experience to produce highly robust detection models. *Learn more in the short video above.*
