VIDEO: Norton Vortex RapidPrep Flap Discs – An MSC Exclusive

Brought To You by Norton Abrasives | Sep 01, 2022

In the short video above, Norton introduces the new **4 1/2" Norton Vortex RapidPrep surface conditioning flap disc**. The Vortex material incorporates their high-performing patented grain which provides the cutting power of a coarser grit with the finish of fine grits, allowing you to remove more material and polish to a finer finish in less steps, saving a lot of time.

It also contains their Clean Bond™ Resin Technology to produce a smear-free finish even on high-nickel content alloys and reduces loading on aluminum and other soft metals. Vortex flat discs are available in the spectrum of grits from coarse to very fine and can be used in blending and light stock removal applications all the way to final finishing.
