VIDEO: TOOLING UP – How to Revolutionize the Drill Bit with Walter Tools

| Sep 13, 2022

Video Highlights

In this episode of MSC's Tooling Up Mitch Free is joined by Sarang Garud, Walter Tool's Product Manager, for a conversation about innovation in drilling. Garud gives us an inside look into his background in engineering that led to his passion and commitment to innovation in the cutting tools industry.

Sarang Garud shares the impact that utilizing a universal drill can have, especially when it comes to the DC160 model. This drill has the power to go from 3x to 30x diameter while maintaining excellent support and accuracy.

These innovations are made possible by Walter's company culture that prioritizes engineering competence - the idea that small, intentional product modifications make a large impact when done with extreme attention to detail.
