VIDEO: Aerospace-Approved TRIM® MicroSol® 692XT Metalworking Fluid

Brought To You by Master Fluid Solutions | Nov 01, 2022

MicroSol® 692XT from Master Fluid Solutions utilizes the latest technology in metalworking fluid, specifically designed for the ultimate performance in demanding, multi-metal production environments. It is clean running and is ideal for machining difficult materials including aerospace aluminum alloys, stainless steel, titanium, copper, and nickel-based alloys. This next-generation coolant is formulated without the use of chlorine, NPEs, and sulfonates, creating a safer work environment with less hazardous waste and lower disposal costs. Boost your productivity with MicroSol 692XT.
