VIDEO: Attain Your Need for Speed with OSG's ADO-Micro Drill

Brought To You by OSG | Dec 01, 2022

OSG introduces the *ADO-Micro Drill* in the short video above. It is ideal for applications in carbon steel, alloy steel, stainless steel, cast iron, ductile cast iron, aluminum alloy, titanium alloy and heat-resistant alloy. Features include:

- **Oil Holes**
Large flow volume enables superior chip evacuation
- **Double Margin**
Supports straightness of drill direction
- **IchAda Coating**
Provides excellent surface smoothness
- **Extended Flute**
Chips are discharged from the tip of the flute to the extended flute with enhanced evacuation capability
- **Removed End of Margin**
Capability to smoothly discharge "micro sludges" that can be easily accumulated around the outer periphery of the tool, which is a key cause of abrupt tool breakage
