VIDEO: Tech Tip #8 – Fundamentals of Drilling

Brought To You by Kennametal | Dec 20, 2022

There are many factors to consider when deciding which drill is best to purchase for your applications. Make sure that:

1. The drill is fully equipped and engineered specifically for the type of material that you're cutting.
2. The drill is prepared for proper chip evacuation with polished chip flutes for easy evacuation.
3. The drill provides efficient internal coolant supply for drills greater than 3xD in length for proper heat management and chip evacuation.

Find out how to choose the correct drill for your application in the short video above.
