

How-to

VIDEO: HOW TO Select the Right Tool for Aluminum

| Jul 12, 2023

Video Highlights

Welcome back to part two of How To's "Back to the Basics" series. Now that you've learned how to properly set up your mill, let's get ready to start working with one of the most common materials you'll find in job shops all around the world: aluminum. In this episode, Jacob is teaching a group of CNC apprentices the building blocks for "HOW TO" select the right tool for aluminum. The principles you'll learn in this episode will give you an in-depth understanding of why we use the tools we do, and set you up to successfully mill aluminum and many other materials down the line. This back-to-the-basics breakdown is an episode you won't want to miss!

For even more insights and expertise, check out MSC's Better MRO knowledge hub.

"How To" is a video content series from MSC Industrial Supply developed with the purpose of serving as a resource for all those who work in, support, and have a passion for the metalworking sector of the manufacturing industry.

Through How To, you'll gain hands-on, practical advice from industry experts currently working in the field. At MSC, we are dedicated to providing real-world practical advice to improve your day-to-day operations.

For more How To videos, check out our MSC How To playlist and subscribe to our YouTube channel.

And check out our other show, Tooling Up, on the MSC Tooling Up playlist.
