Cut Protection You Never Want To Take Off

Brought To You by Ansell | Nov 01, 2023

Comfort and Performance in a Wide Range of Cut Levels

Ansell's range of HyFlex® gloves are designed to protect you against various cut hazards while on the job. The HyFlex® family of gloves can help protect you from cut injuries when handling sharp objects, machinery and equipment. Choose the PPE that suits your needs and the hazards you face. HyFlex® gloves are packed with innovations that balance protection, comfort, and performance.

Some of these innovations include:

- **Touchscreen compatible** – Full tactile control for unbeatable touch accuracy
- **High dexterity** – Enhanced flexibility and tactility all over the hand
- **Unmatched comfort** – Ultra-lightweight and breathable for all-day comfort
- **High cut protection** – High cut resistance for superior protection defending workers from scrapes and lacerations

Designed With Worker Experience Innovations

INTERCEPT™ Technology blends engineered, synthetic and natural fibers into high-performance yarns that provide high cut protection in targeted areas of cut risk, along with great comfort and high dexterity. It offers up to 20% lighter design versus standard EN ISO/ANSI-rated gloves of the same cut protection level.

ZONZ™ Technology uses selected yarns and varying knit construction to optimize overall glove fit and enhance hand movement for higher dexterity and reduced fatigue. Features include open weave zones for ventilation and dexterity and a thumb crotch for comfort.
