VIDEO: Grinding And Blending Metal In One Easy Step with Norton Rapid Blend!

Brought To You by Norton Abrasives | Jan 02, 2024

Norton Vortex Rapid Blend discs are made from compressed and bonded layers of nonwoven abrasive. Applications include deburring, cleaning composites, and sharp edge removal. Unified wheels produce excellent finishes on nearly all surfaces, and they are ideally suited for use on harder materials such as titanium or stainless steel.

Watch and learn how to reduce steps in grinding down a weld with the Norton Vortex Rapid Blend Coarse Grit Non-Woven vs. a Bonded Depressed Center Wheel.
