VIDEO: Get Unfamiliar with Downtime - HARVI™ IV 8-Flute Solid Carbide End Mills!

Brought To You by Kennametal | Feb 01, 2024

HARVI IV 8-Flute End Mills are the latest addition to Kennametal's HARVI family of high-performance and versatile end mills. With a unique design that offers higher metal removal rates and feed rates than 7-flute end mills and more versatility than traditional 9-flute end mills, HARVI IV 8-Flute End Mills keep customers cutting in difficult-to-machine materials. Rough and finish with one reliable tool in high-temp alloys, stainless steel, steels and hardened materials while achieving powerful chip clearance from internal coolant channels. Level up with 8 flutes and get unfamiliar with downtime. See it in action in the short video above (*music only, no transcript*).
