

Fall Protection and Training

VIDEO: TOOLING UP – Don't Fall Behind: Keeping Up with the ANSI Update

| Feb 16, 2024

Video Highlights

In this episode of MSC's Tooling Up, Toni Neary is joined by Jon Eichman, Fall Protection Sales Training Manager at 3M for a discussion on how to stay up to date with fall safety best practices outlined by the most recent ANSI/ASSP Z359.14-2021 update.

Jon dives into his personal history with working at height, and the important role 3M has taken in keeping workers safe from the number two cause of workplace deaths in the United States: falls. Toni and Jon discuss the most recent ANSI/ASSP update to fall safety best practices as they relate to self-retracting lifelines, or SRLs. The duo take a look at 3M's extensive line of SRLs, and how to decide which one is right for your specific application.

Keeping your workers safe and secure is of paramount concern, and you want to keep up to date with the best practices in SRL technology to ensure you don't fall victim to easily solved workplace hazards. If you want to keep your team safe and secure at height, this is the Tooling Up episode for you.
