VIDEO: Feel the Power! Watch 3M™ Cubitron™ 3 Fibre Discs Conquer Four Heavy Grinding Applications LIVE!

Brought To You by 3M Abrasives | Mar 01, 2024

By using long-lasting, fast-cutting **3M™ Cubitron™ 3 Performance Abrasives**, you can minimize abrasive changeover to save money over time. Stiff fiber backing and a strong resin bond provide durability and tear-resistance for heavy grinding applications from beveling, weld grinding, surface grinding to deburring, and flame cut smoothing. In each application the product grinds more freely and at lower temperatures, helping to reduce job times, operator fatigue, and minimize re-work. *Watch it in action in this short video (music only, no transcript).*
