

How-to

VIDEO: HOW TO Machine Exotic Materials

| Feb 29, 2024

Video Highlights

Dive into the fascinating world of metalworking with Jacob Sanchez, Greg McArthur, and Mike Smith as they tackle the challenge of machining exotic materials like Nitronic 50. Join us as we explore the journey to ITAR registration, the importance of tooling selection, and the quest for optimal feeds and speeds. Get insider tips from industry specialists at Seco Tools and MSC Industrial Supply as they help NTL Industries overcome obstacles and boost productivity. Whether you're a seasoned machinist or just curious about the process, this video offers valuable insights and practical demonstrations to teach you HOW TO machine exotic materials.

For even more insights and expertise, check out MSC's Better MRO knowledge hub.

"How To" is a video content series from MSC Industrial Supply developed with the purpose of serving as a resource for all those who work in, support, and have a passion for the metalworking sector of the manufacturing industry.

Through How To, you'll gain hands-on, practical advice from industry experts currently working in the field. At MSC, we are dedicated to providing real-world practical advice to improve your day-to-day operations.

For more How To videos, check out our MSC How To playlist and subscribe to our YouTube channel.

And check out our other show, Tooling Up, on the MSC Tooling Up playlist.
