

Metrology

VIDEO: HOW TO Increase ROI with Metrology

| May 02, 2024

Video Highlights

Metrology, it's that step at the end of your machining process where you check your measurements right? Well, kind of. Precision measurement is a critical part of making sure you get accurate product out your door, and every step counts. But what if you could not only increase your accuracy but increase your shop's overall ROI along the way? Sound too good to be true? Well, Jacob Sanchez is on site at the Mitutoyo showroom to see how metrology can increase your ROI, and how every step in the process having precise feedback can improve your overall efficiency.

For even more insights and expertise, check out MSC's Better MRO knowledge hub.

"How To" is a video content series from MSC Industrial Supply developed with the purpose of serving as a resource for all those who work in, support, and have a passion for the metalworking sector of the manufacturing industry.

Through How To, you'll gain hands-on, practical advice from industry experts currently working in the field. At MSC, we are dedicated to providing real-world practical advice to improve your day-to-day operations.

For more How To videos, check out our MSC How To playlist and subscribe to our YouTube channel.

And check out our other show, Tooling Up, on the MSC Tooling Up playlist.
