## **VIDEO: TOOLING UP: Everything You Need to Know About High Feed Machining**

| Jun 25, 2024

### **Video Highlights**

In this episode of MSC's Tooling Up, Toni Neary is joined by Jay McCord, America's Indexable Product Specialist at Seco Tools, to discuss the innovative SP High Feed family of cutters. Jay shares his journey in the manufacturing industry, starting from an apprenticeship in a tool and die shop to his current role at Seco Tools. Toni and Jay discuss the concept of high feed machining, highlighting how the SP cutter family enhances metal removal rates with increased depth of cut and advanced features such as square inserts with straight edge lines and dual coolant channels.

The conversation explores the application of high feed machining across various industries, including aerospace, automotive, and mold and die, and how Seco's SP cutters improve efficiency and productivity. Jay emphasizes the tool's ease of use, with no significant learning curve required, making it a game-changer for customers.

If you are interested in staying at the forefront of machining technology and improving your shop floor operations with cutting-edge tools, this is the Tooling Up episode for you.
