VIDEO: TOOLING UP: The Hidden Benefits of High Quality Coolants

| Nov 21, 2024

Video Highlights

In this episode of Tooling Up, host Toni Neary is joined by John Treese, Director of Global Training at Master Fluid Solutions, discussing the importance and benefits of cutting and grinding fluids in machining processes.

The conversation highlights how Master Fluid Solutions' products improve lubrication, cooling, and overall machining performance, enabling faster speeds and higher productivity. John emphasizes the often-overlooked impact of high-quality coolants on operator comfort, machine efficiency, and employee retention.

The conversation addresses common coolant-related issues such as foam, odor, rust, and skin irritation, as well as explaining how their products are designed to minimize these challenges. The video also underscores the role of coolant in reducing hidden costs and enhancing the manufacturing process.

The episode wraps up with insights into how Master Fluid Solutions' innovations not only optimize machining but also contribute to a better work environment for operators, boosting productivity and retention.

Tooling Up is a video series by MSC Industrial Supply Company that provides real-world insights brought to you by leading industry experts and aimed at improving the efficiency and productivity of your operations. Through Tooling Up, you'll gain access to our knowledgeable in-house specialists and experts from our most-trusted partners and suppliers, along with some exclusive innovative offerings from MSC. From metalworking and MRO supplies, services, and expertise, to inventory management

solutions, and to the safety and well-being of your team, we are dedicated to working side-by-side with you to make your operations better.
