VIDEO: Take Your Welding Craft to a New Level

| Dec 02, 2024

Introducing the 3M™ Speedglas™ G5-03 Pro and Pro Air Welding Helmets. One great design, two versatile helmets. The outside has a smooth contour to prevent your helmet getting caught on something when working in narrow spaces. The unique tap function lets you switch quickly between grinding and welding by simply tapping on the side of the helmet. Take your craft to a new level. *Learn all about it in the short video above.*

Previously Featured on 3M Personal Safety Division's YouTube channel.
