Communications Built With a Purpose

Brought To You by Motorola | Mar 05, 2025

Motorola is there when you're working on repairing an electrical line in a remote area and need to bring in additional help. They're there when you're coordinating the assembly line on a bustling factory floor. They're there when an allergic reaction in the cafeteria requires the attention of the school nurse. And they're there when your team is running into a burning building.

Motorola is there whenever you need to communicate quickly and clearly – because they know that in the everyday and the most critical of moments, being able to stay connected can make all the difference.

At Motorola Solutions, they understand the critical nature communication plays in staying safe and productive. It's why they continue to design and deliver devices and infrastructure that help keep you connected in any environment, even the harshest conditions and situations.

A wide range of solutions helps your teams and personnel stay safe and connected, whatever your line of work. No-compromise police radios are designed collaboratively with first responders to provide a solution that is reliable, intuitive and built to work under the toughest conditions. Professional digital mobile radios are built to the highest specifications, providing outstanding range, battery life and responsiveness so teams can collaborate more effectively and work more efficiently. Broadband-enabled devices bring together the data capabilities and applications of an Android device with the ruggedness and reliability of a business-critical push-to-talk device to help your team stay informed. And multi-network interoperability helps to connect your team across devices, networks and locations.

With a proven and time-tested record, Motorola's devices and networks are trusted by public safety agencies and enterprise teams around the world. And as a critical part of their powerful **safety and security ecosystem**, together with video security systems and voice, video and data all unified in a single command center view, their communication devices and networks play an important role in helping to protect people, property and places. Because they know that the seamless connection of people and information helps to build the foundation of safety and security that allows organizations and communities around the world to thrive.
