Here's How it Works

The Sentinel Program's 5-Phase Methodology is a holistic approach to optimizing your operation's safety and cost-performance. Beginning with a comprehensive hazard assessment, we identify risks in your workplace and establish a benchmark to measure the impact of Sentinel's effectiveness over time.

1. EVALUATION:

SHOWA's highly-trained field experts conduct a comprehensive on-site hazard assessment to identify inefficiencies and turn them into opportunities.

2. BENCHMARK:

After determining business goals and objectives, we use your current performance metrics as a baseline to help measure Sentinel's impact over time.

3. IMPLEMENTATION:

A customized safety plan is designed and implemented to improve your operation's cost-performance by reducing risk, injuries, and subsequent expenses.

4. MEASUREMENT:

Sentinel's effectiveness is quantified by comparing new performance data to your baseline, followed by the establishment of your next milestone.

5. MANAGEMENT:

Upon successful integration of your customized safety plan, our service experts provide ongoing assistance to ensure you get the most from your investment long-term.
