National Marker Sign Muscle

National Marker Corporation | Aug 28, 2017

NMC is adding more value to our safety signs and labels with the addition of our Sign Muscle™ coating, a coating designed to extend the life of the product.

Sign Muscle™ coating will protect your signs and labels from scuffs and scratches, while providing excellent color clarity and a smooth edge. The UV light inhibitors in the coating will also protect your product from fading. Best of all it's at no added cost!
