

The Industrial Internet of Things

Disruptive Technologies in Manufacturing

Brought To You by Deloitte UK | Oct 10, 2017

Video Highlights

- Industry 4.0 represents a broader instantiation of the internet of things concepts to take on the entire manufacturing cycle.
- Industry 4.0 completes the circuit by going from physical to digital and back to physical through the deployment of advanced manufacturing technologies.

Learn more about Industry 4.0 and what's next in manufacturing *here*.
