To Infinity and Beyond: Aerospace Opportunities in Manufacturing Take Off

Don Sears | Dec 19, 2017

Aerospace and defense are a major economic force in global manufacturing and are powered, in part, by the metalworking parts-making industry. Take a look out our infographic to get the details.

Metalworking and original equipment manufacturing shops: Take notice. Whether you are a subcontractor or a major aviation and defense player, aerospace has a positive long-term outlook on revenue, earnings and jobs. Demand for commercial air travel and an expected rise in defense spending is *fueling global growth* in aerospace, according to PwC.

"We expect this combination of a growing consumer base and low operating costs to benefit the aerospace components manufacturers and the OEMs well into the future," *describes* Michael Guckes, chief economist for Gardner Intelligence, in a Modern Machine Shop article.

To Infinity and Beyond

Aerospace Opportunities in Manufacturing Take Off

In the United States, the aerospace industry continues to grow. It's a critical opportunity area for metalworking parts manufacturers.

We're #1:

U.S. Is Largest Aerospace Manufacturer

There's More to Come

U.S. Commercial Fleet Outlook Trending Upward

3 Regions Lead the Way

These States Are Major Hubs

New Materials Take Flight

Drives Need for Unique Metalworking Skills

COMPOSITE MATERIALS

\$3.9B
5.3% Compound Annual Growth Rate (2017 to 2022)

CERAMIC MATRIX COMPOSITES
8.9% CAGR (2016 to 2021)

TITANIUM
3.3% CAGR (2015 to 2020)

U.S. Military Might

Defense Growth Returns
