Video: How to Collect Data with Mitutoyo MeasurLink

Brought To You by Mitutoyo | Jan 29, 2018

MeasurLink Real-Time enables you to connect and acquire data from virtually any measuring device. It supports the full range of metrology technology, including *calipers, micrometers, indicators, CMMs, vision systems* and more. Select the edition to fit the device and your needs.

Designed for customers who want to acquire and analyze data in real-time and check variable and attribute inspection to maximize production and minimize defects. It has views to allow the user to create parts, and characteristics with nominal and tolerance and traceability lists. The data collection interface provides real-time graphics for run charts, control charts, histograms and statistics. Standard views include Datasheet (observations and charts), Classic View (chart windows), and 2D view (part images with callouts that include charts and statistical data) along with a customizable Info View and additional Manager views. Full reporting template functionality is also provided.
