PRO-SAFE Anti-Fatigue Mats

Brought To You by PRO-SAFE[®] | Jan 02, 2025

PRO-SAFE[®] anti-fatigue mats are designed to reduce stress on joints and minimize back, leg and foot fatigue. A well-designed anti-fatigue mat program improves workers' energy and productivity. Other benefits are improved morale and a healthier workforce.

Features:

- Ergonomic foam effectively suspends the body's weight, and reduces the impact on the joints. It works like a spring.
- Resilient and buoyant, our foam construction bounces back to the foot, alleviating discomfort and pain.
- Offers softness, support and better weight distribution.
- Surface texture and beveled edges for added safety.
- Made in USA.

Where Anti-Fatigue Mats are Used:

- Industrial work stations
- ~~EE~~ Service counters
- Cashier stands
- Assembly lines
- Hospitals and laboratories
- Distribution and packing work cells
