## Video: DEWALT® Perform & Protect™ - Tool Control

Brought To You by DEWALT | Feb 16, 2018

Tools can bind up in normal drilling or cutting applications, which can cause injury to the user or damage the tool.

*DEWALT's E-Clutch System®* provides enhanced control to the user in a bind-up situation and can help minimize sudden torque reaction compared to standard clutches. DEWALT's Kickback Brake™ feature slows the wheel when a pinch is detected.

*Previously featured on DEWALT's Youtube page.*

*Click here for more information on DEWALT's E-Clutch System®.*
