Video: Cutting Days

Brought To You by Precision Twist Drills | Apr 24, 2018

Cutting Days is a trade fair organized by Precision Twist Drills and takes place at their indexable production unit in Šumperk, Czech Republic.

Free to attend, this year's event ran from 4 – 12 September 2017 for customers and students from local schools and technical universities. This year's Cutting Days was the biggest in the history of Precision Twist Drills, with the number of visitors exceeding 2,000. Also, this year's event can be considered as truly global with a total of 23 groups from abroad visiting Šumperk.

The agenda included an introduction of Precision Twist Drills brand new research, development and training facility - the Experience Center - and a product exhibition featuring more than 1,000 indexable and round tools. In addition, there was a presentation of 16 specially invited partners, production tours and a visit to the nearby Dlouhé Stráně hydro power plant, where there was a focus on presenting success stories from various industry segments.
