IMTS 2018 VIDEO: Success—High-Feed Milling Cuts Machining Time by 78%

| Sep 25, 2018

Video Highlights

- To get more done at a better price point, think about the total cost of ownership of your milling tools versus the price tag. MSC senior metalworking specialist Robert Goodwin talks about how an automotive parts maker reaped savings by moving to high-feed milling.

To get more done at a better price point, think about the total cost of ownership of your milling tools versus the price tag.

Don't let sticker shock dissuade you from testing and trying out tools in your shop doing real work, says MSC senior metalworking specialist Robert Goodwin.

That's the only way to get valid metrics and price out possible savings, he says. By way of example, Goodwin shares how an automotive parts maker reaped savings by moving to high-feed milling.

Participant:

- Robert Goodwin, Senior Metalworking Specialist, MSC
