IMTS 2018 VIDEO: Success—Tooling Change Cuts Deep Drilling by 4 Minutes

| Sep 25, 2018

Video Highlights

- An aerospace parts maker needed to machine deep holes—at more than 50x diameter—and found that its gun drilling method would take four and half minutes per hole. MSC senior metalworking specialist Tom Prisaznuk explains how moving to new tools and changing the machining process cut drilling time down to well under a minute.

An aerospace parts maker needed to machine deep holes—at more than 50x diameter—and found that its gun drilling method would take four and half minutes per hole.

An MSC senior metalworking specialist explains how moving to new tools and changing the machining process cut drilling time down to well under 1 minute.

Participant:

- Tom Prisaznuk, Senior Metalworking Specialist, MSC
