Video: Kennametal KenTIP FS

Brought To You by Kennametal | Mar 06, 2019

Watch this quick video showing the Kennametal KenTip FS 12xD deep hole drilling in steel.

Some good ideas can be made even better. Much better. This was certainly the case when Kennametal engineers took the strength and versatility of their proven KSEM modular drill system and combined it with the ease of use and low feed forces of its smaller companion drill, KenTIP. The resulting fusion of these advanced holemaking technologies is the KenTIP FS, a 6 mm to 26 mm, 1.5 to 12 x D modular drill that's simple to use, produces good hole quality, and is tough enough to compete with solid carbide drills across a wide range of materials.
