Ergonomic Anti-Fatigue Safety Solutions

Brought To You By MEGAComfort | May 29, 2019

The need for effective anti-fatigue solutions in the workplace is becoming more prominent as workers over the age of 55 are expected to make up nearly one quarter of the labor force by 2026. Aging workers are almost 20% more prone to musculoskeletal disorders, which comprise a third of all injury incidents.

To estimate potential injury cost versus cost savings at your facility, download MEGAComfort's pain calculator.
