ASSP Safety 2019 Video: Success—Achieving Compliance and Saving \$100,000

| Jun 11, 2019

Video Highlights

- When a manufacturing facility asked for a safety assessment of its metal press operations, it wasn't aware it was at risk of a fall protection violation.
- The installation of a railing system combined with the use of harnesses now reduces the risk of falls by the plant's workers.

MSC Safety Specialist Damon Cassell shares how the fall protection solution brought the metalworking shop into compliance and delivered cost savings.
