VIDEO: The Real Cost of Coolant

Brought To You By Master Fluid Solutions | Jul 01, 2019

Video Highlights

- Coolant is a critical component of your business and likely the only “tool” that touches every machined part you make.
- While coolant represents less than 1/2% of your total cost of operations, the type of coolant you use affects everything in your shop.
- The right coolant can provide you with cost savings, improved part quality, better tool life, more operator acceptance, and decreased usage.
