New, Liquid-Tight Tyvek® 800 J Garment From DuPont is Both Comfortable and Robust

Brought To You by DuPont | Oct 01, 2019

Tyvek® 800 J is a new limited-use Type 3¹ chemical protective garment from DuPont that combines resistance to pressurized jets of low-concentration, water-based, inorganic chemicals with protection, durability and freedom of movement thanks to its innovative "Tyvek® 800 J Fabric Technology."

Tyvek® 800 J stands up to even pressurized jets of liquids and offers suitability for a variety of industrial cleaning, food manufacturing, agriculture, petrochemical, sewer, environmental remediation and maintenance applications.

DuPont designed Tyvek® 800 J for optimum comfort. The enhanced garment delivers an ergonomic fit that adapts to the wearer's movements. The breathability of Tyvek® 800 J makes it especially welcome in hot, humid environments.

Watch the short video below for a demonstration of the protection offered by this innovative new garment.

Suitable protection against a broad range of water-based chemicals no longer comes at the price of comfort. DuPont's Tyvek® 800 J coverall provides an optimum fit with full freedom of movement. It is soft, breathable and lightweight without compromising on durability.

Some of the features include:

- Hood shape
- Integrated chin flap
- Stitched and over-taped seams
- Elasticated thumb loops
- Elasticated cuffs
- Elasticated waist
- Elasticated ankles

Click [**here**](#) to download a PDF to explore these features and learn more about how DuPont's Tyvek® 800 J keeps you comfortably protected.

¹ Additional taping of cuffs, ankles, hood and zipper flap required to achieve Type 3 liquid tightness. Chemical protective clothing, category III, Type 3-B, 4-B, 5-B and 6-B. Does not provide protection from ionizing radiation.
