# Safety

Slips and falls are a leading cause of workplace accidents in terms of frequency & severity.

Falls are the primary cause of emergency room visits in the United States, according to the Centers for Disease Control and Prevention.

## **Causes of slips, trips and falls vary:**

- Walkway spills and surface contamination
- Snow, ice, or inclement weather
- Use of inappropriate footwear
- Walkway surfaces in disrepair
- Slippery floors
- Lack of matting

According to the National Safety Council, the cost of a slip, trip or fall related accident ranges between **\$16,000 to \$28,000**. These injuries not only increase operational costs, but also contribute to indirect costs such as higher insurance rates, reassignment of personnel and loss of productivity.

Slips and falls are the third largest cause of workplace injuries. Within North America, slips and falls lead to approximately 104 million lost workdays each year and in-turn end up costing approximately **\$36 billion dollars each year**.

**A easy and cost effective way to reduce work place accidents is to install the appropriate matting system.**

## Where anti-fatigue mats are used:

- Industrial work stations
- Service counters
- Cashier stands
- Assembly lines
- Hospital and laboratories
- Distribution and Packing work cells

# Comfort

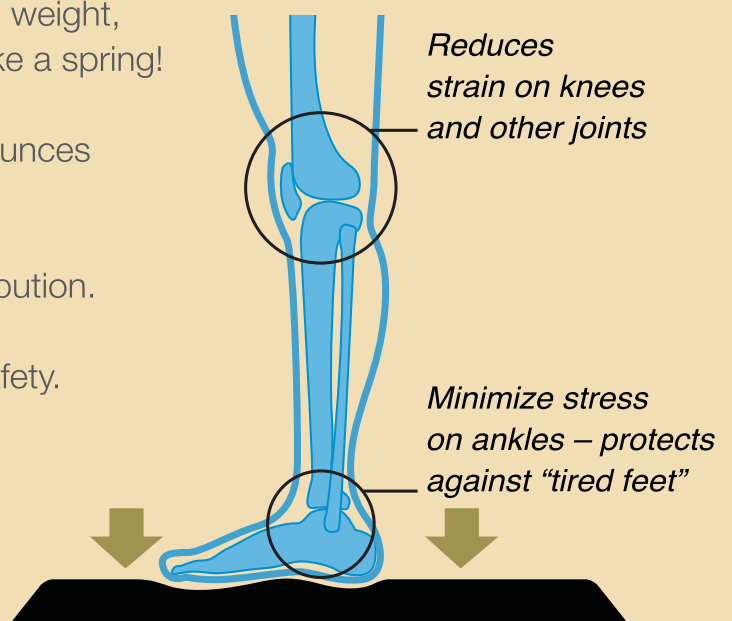

Standing on hard surfaces for long periods of time produces detrimental effects on the body.

PRO-SAFE® anti-fatigue mats are designed to reduce stress on joints and minimize back, leg, and foot fatigue. A well designed anti fatigue mat program improve workers energy and productivity. Other benefits are improved morale and a healthier workforce.

## + The Orthopedic Advantage

- Ergonomic foam effectively suspends the body's weight, and reduces the impact on the joints. It works like a spring!
- Resilient and buoyant, our foam construction bounces back to the foot alleviating discomfort and pain.
- Offers softness, support and better weight distribution.
- Surface texture and beveled edges for added safety.
- Made in USA

# Clean Environment

Seventy percent of all dust, dirt and floor damaging soil found in commercial buildings are tracked inside a building from people's shoes.

**PRO-SAFE**<sup>®</sup> provides best possible dust and dirt protection. By capturing fine dirt, dust and moisture, our high performance entrance mats save thousands of dollars of floor maintenance while protecting floors from premature wear and aging.

When planning a mat program, high traffic areas should be identified and consideration given to environmental exposure. Strategic placement of mats is essential for maximum effectiveness.

# Performance

**PRO-SAFE®** offers a icon guideline that easily identifies product ratings and features. Each product is ranked in a Good-Better-Best classification to help customers select the appropriate mat. This helps the customer meet their application requirements.

## PRO-SAFE® PRODUCT PERFORMANCE RATINGS

PRO-SAFE® product features are rated with a GOOD, BETTER, BEST ranking to assist customers select the appropriate matting.

## PRO-SAFE® ANTI-MICROBIAL MARBLEIZED SPONGE BASE ANTI-FATIGUE MATTING

### For Use in Dry Work Areas

Anti-microbial marble grain pattern on top of sponge base makes for an aesthetically pleasing anti-fatigue mat. These mats are extremely durable, allowing them to be used in high traffic or long use areas. Mats contain a non porous vinyl top surface that kills microorganisms on contact as well as increased wear and chemical-resistance.

**Material:** Anti-microbial Durable vinyl marbleized with specially designed, resilient ergonomic closed-cell sponge base.

**Edges:** Safety bevels on all four sides prevent tripping

**Anti-Fatigue:** 1/2"(Best), 7/8" (Ultimate)

**Slip Resistance:** Best

## PRO-SAFE® RUBBERIZED PYRAMID SPONGE BASE ANTI-FATIGUE MATTING

### For Use in Dry Work Areas

Large industrial "rubberized" top surface mats provide greater traction and compression properties compared to traditional composite-type anti-fatigue mats.

**Material:** Durable large pyramid "rubberized" vinyl surface bonded to an Ergoflex ergonomic sponge base

**Colors:** Solid Black or Black with Safety Yellow Borders

**Edges:** Safety bevels on all four sides prevent tripping

**Anti-Fatigue:** 11/16 (Best)

**Slip Resistance:** higher co-efficient of friction wet & dry compared to traditional diamond plate mats.

# PRO-SAFE® RUBBER MODULAR ANTI-FATIGUE MATTING SYSTEM (DRAINAGE & NON-DRAINAGE)

## For Use in Wet or Dry Areas

These mats are substantial, modular molded rubber anti-fatigue mats that come in three different compounds and four different styles to meet your applications. You can use them individually as a workstation mat or interlock them to quickly cover large areas like tiles. When added traction is needed please refer to the styles with grit-coating, a surface which provides 40% more traction than OSHA recommends in wet areas. For added safety, please refer to the edging(ramps) option under 'How to Order'.

**Material Thickness:** 5/8"

**Color:** Black

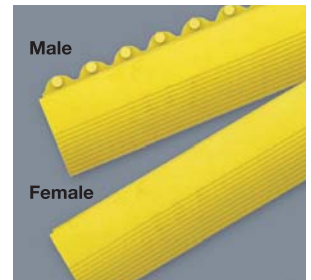

**Edges:**

- All-Purpose Open Tile (male connectors 1 adjacent side and rotate)
- ALL-Purpose Solid Tile ( male connectors 2 adjacent sides and rotate)
- CFR Plus Open Tile (male connectors 1 adjacent side and rotate)
- 100% Nitrile Petrochemical Open Tile (male connectors 2 sides and rotate)

**Grit-Coating:** Ultimate

**Anti-fatigue:** Better

**Slip Resistance:** Best

## How to Order

**Choose tile type:** Solid surface or drainage (holes)

**Choose tile compound:** All-purpose, 100% Nitrile Petrochemical resistance or CFR Plus

**Choose surface type:**

Solid top (Smooth natural emboss or eith grit-coating)

Open tile (natural surface pattern or grit-coated)

**Choose quantity of optional edging:** (ramps)male an/or female ramps

**Drainage Tile(Open Tile):** Use in wet areas for drainage, or in dry environments where small debris is present.

**Solid Tile(no holes):** Use in dry areas where small component parts fall to the floor or when maintenance carts need to be rolled or used at workstation.

# PRO-SAFE® LARGE DRAINAGE HOLE ANTI-FATIGUE MATTING

## For Use in Wet or Dry Areas

These mats are ideal for wet environments, or when heavy debris is a concern. The large drainage holes facilitate drainage, resist clogging and keep you comfortable. These mats are durable and stand up to high traffic. The option of a carbide grit surface coating will significantly enhance traction and help reduce potential slips due to residual fluid on top surface.

### PRO-SAFE® 1/2"

**Material:** Natural/SBR rubber

## PRO-SAFE® RUBBER GRIT SCRAPER MAT

### For Outdoor or Indoor Use

Classic durable pattern with decorative colored grit coating effectively scrapes debris, snow and moisture off shoes. High content of recycled rubber provides weight to restrict movement and is highly resistant to harsh outside elements. Simply hose off or shake out debris to clean.

**Material:** 97% recycled content, recycled rubber with decorative heather-blended colored grit coating. A true GREEN product.

**Colors:** Chestnut and Graphite

**Top Surface:** Grit-coating technology significantly enhances most-needed traction due to outdoor elements.

**Edging:** Raised perimeter borders helps trap moisture, snow, sand and other debris from being tracked beyond its placement.

**Slip Resistance:** Ultimate

# PRO-SAFE® 3-STAGE ENTRANCE MATTING SYSTEM FOR LIGHT-TO-MODERATE TRAFFIC AREA

**For Outdoor -to-Indoor Use**

3-Stage entrance matting system provides you with color coordinated performance-driven mats that address a whole entrance system from outdoor scraping to indoor drying. Mats remove soil and heavy debris from foot traffic and help reduce the moisture, dirt and dust tracked inside.

**Material:**

*Stage 1:* Outdoor mat consists of coarse synthetic grass polypropylene looped fiber.

*Stage 2:* Indoor mats for vestibule and foyer area consists of a combination of rows of looped-pile polypropylene and synthetic grass fiber.

*Stage 3:* Indoor mat for enhancing the drying stage consisting of looped polypropylene fiber. Looped pile construction is resilient and will keep the fiber from being compressed.

**Colors:** Charcoal, Navy Blue and Burgundy

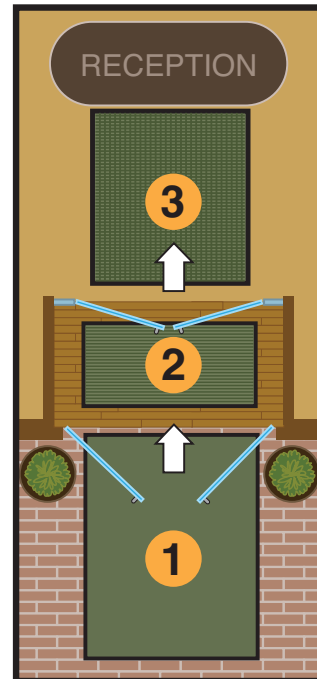

**Backing/Edges:** Lay-flat durable vinyl backing with four black borders around the perimeter of mat.

**Abrasion Resistance:** Stage 1: Best, Stage 2: Better, Stage 3: Good.

**Moisture Absorbent:** Stage 1: Good, Stage 2: Better, Stage 3: Best.

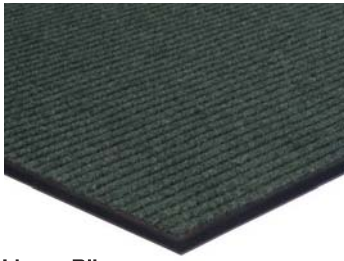

*Offered as individual mat or in a kit of 3 mats (all will be same size)*

## ENTRANCE MATTING SYSTEM

Color coordinate a complete entrance area with these three distinctive mats for outside (1), foyer (2), and inside (3) use

**Linear Rib**

Available Colors:

Green Brown Gray Pepper

# PRO-SAFE® ENTRANCE MATTING FOR MEDIUM TRAFFIC AREAS

**For Indoor Use**

This attractive entrance matting has excellent scraping and dirt removal abilities. The vinyl backing reduces movement. Easy to clean; use in entrances, vestibules or lobbies.

**Material:** 100% tightly woven poly-blended carpet bonded to a vinyl backing.

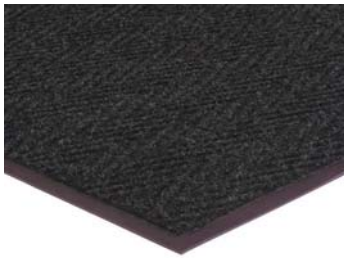

**Thickness:** 5/16"

**Linear Rib Colors:** Green, Brown, Gray and Pepper

**Chevron Rib Colors:** Brown, Charcoal and Blue

**Edges:** Straight cut edges, four black borders around perimeter of mat.

**Soil Resistance:** Better

**Chevron Rib**

Available Colors:

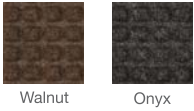

Brown Blue Charcoal

## PRO-SAFE® ENTRANCE MATTING FOR HEAVY TRAFFIC AREAS

**For Indoor Use**

Entrance matting will protect your floors, while reducing slips and falls. All matting has a rubber molded backing that provides heft and durability, as well as weight to keep mat in place in heavy traffic. Durable enough to be used in all high traffic areas, such as main lobbies, vestibules, bottom of steps and between offices. Easy to clean and maintain.

The recycled rubber mats are made from 97% recycled rubber tires, with a molded carpeted design. Carpet is out to the edges.

Nitrile material is rubber molded, 100% tightly woven poly-blended carpet with a Nitrile rubber backing and rubber border around perimeter of mat.

**Recycled Rubber Mat Colors:** Walnut and Onyx.

**Nitrile Rubber Mat Colors:** Walnut, Blue and Pepper.

**Edges:** Both styles of mats have a grade to the floor to help prevent slips and falls.

**Water Retention:** Excellent

# Plant Assessment Questions

Asking the right questions will help determine the right mat for the right application

## Does your company have a safety program that incorporates mats & matting?

Please send 'Did You Know?' Facts regarding statistics and causes due to slips and falls

- Have you ever had workman's comp claim due to slips & falls?
- Have you ever had a workman's comp claim due to leg or back injury?

## Does your company currently use mats & matting?

- If YES, see or inquire about the brand they are currently using.
- If NO, start the procedure for assessing placement and uses for mats & matting
- Are you currently in a project that might require matting?

## If Dry Area, then ask the following questions:

- Will this dry area come in contact with fluids/chemicals whatsoever? Even if brief...
- What types of fluids...even if brief?
- What is the current procedure for maintenance of mats?
- What is believed to be the current traffic level on these mats? Light, Light-to-moderate, Moderate-Heavy, Heavy
- Will it be foot traffic, chair movement, cartage or material handling equipment moving atop of mats?
- Will employees/management be wearing work shoes, sneakers, work boots and/or high heels atop of mats?
- Will there be any metal chips or shavings on the mat?
- Is enhanced traction needed atop of mat?
- Is this a welding area?
- Will the particular department's workcell require us to take measurements?
- Will the workcell handle standard size mats?
- Will the department's workcell require a custom configuration or special width?
- Does the company like to highlight the flooring with safety lines?
- What life expectancy of the mat would you like to have?
- Does your company require dry-area matting that must be modular and have additional connectivity?
- Do these mats need to be anti-microbial?

## If wet Area, then ask the following questions:

- What types of fluids/chemicals will come in-contact with these mats?
- Common chemical types> If YES, please list...
- Cutting Fluids> Yes or no
- Petroleum-based chemicals or caustic fluids> If YES, please list...
- What approximate volume (how much?)of chemicals/fluids come in-contact with the mats during daily production/activity?
- What is believed to be the current traffic level on these mats? Light, Light-to-moderate, Moderate-Heavy, Heavy
- Will it be foot traffic, chair movement, cartage or material handling equipment moving atop of mats?
- Will employees/management be wearing work shoes, sneakers, work boots and/or high heels atop of mats?
- Is enhanced traction needed atop of mat?
- Will there be any metal chips or shavings on the mat?
- Is there any eye wash stations? If YES, How many?
- Is there any residual fluid that could possibly stay atop of mat based upon the type of fluid volume it comes in contact with?
- Will the particular department's workcell require us to take measurements?
- Will the workcell handle standard size mats?
- Will the department's workcell require a custom configuration or special width?
- Does the company like to highlight the flooring with safety lines?
- What life expectancy of the mat would you like to have?
- Have you experienced a limited life when mats were exposed to chemicals?
- Please provide product/brand and types of chemicals that came in-contact...
- Does your company require wet-area matting that must be modular and have additional connectivity?

## If Static Control, then ask the following questions:

- Does workcell require tabletop surface, floor surface or both types of matting?
- Does sensitive components require material to be static dissipative, anti-static or conductive?
- Does their static control procedures require mats to be grounded?
- Does your company need 'SWITCHBOARD' type matting for special; conductivity/absorbency around electrical panels?
- If YES, do you need a military spec switchboard mat?

## If Entrance Mats, then ask the following questions:

- Does your company rent entrance mats (from a service) or purchase their own?
- Does your company have exterior entrance mats?
- Does your company use interior mats or have mats in a vestibule area?
- What is believed to be the current traffic level on these mats? Light, Light-to-moderate, Moderate-Heavy, Heavy
- What life expectancy of the mat would you like to have?
- Do you have logo mats?
- Do you use 'safety' slogan logo mats?
- What is the current procedure for maintenance of mats?

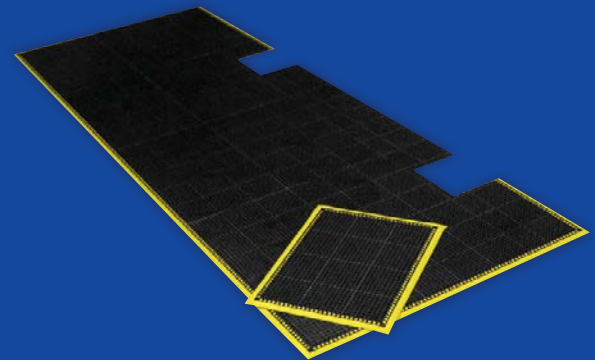

# NEED A CUSTOM MAT?

*Did you know?*

*That 20-30% of  
the matting business  
is customized*

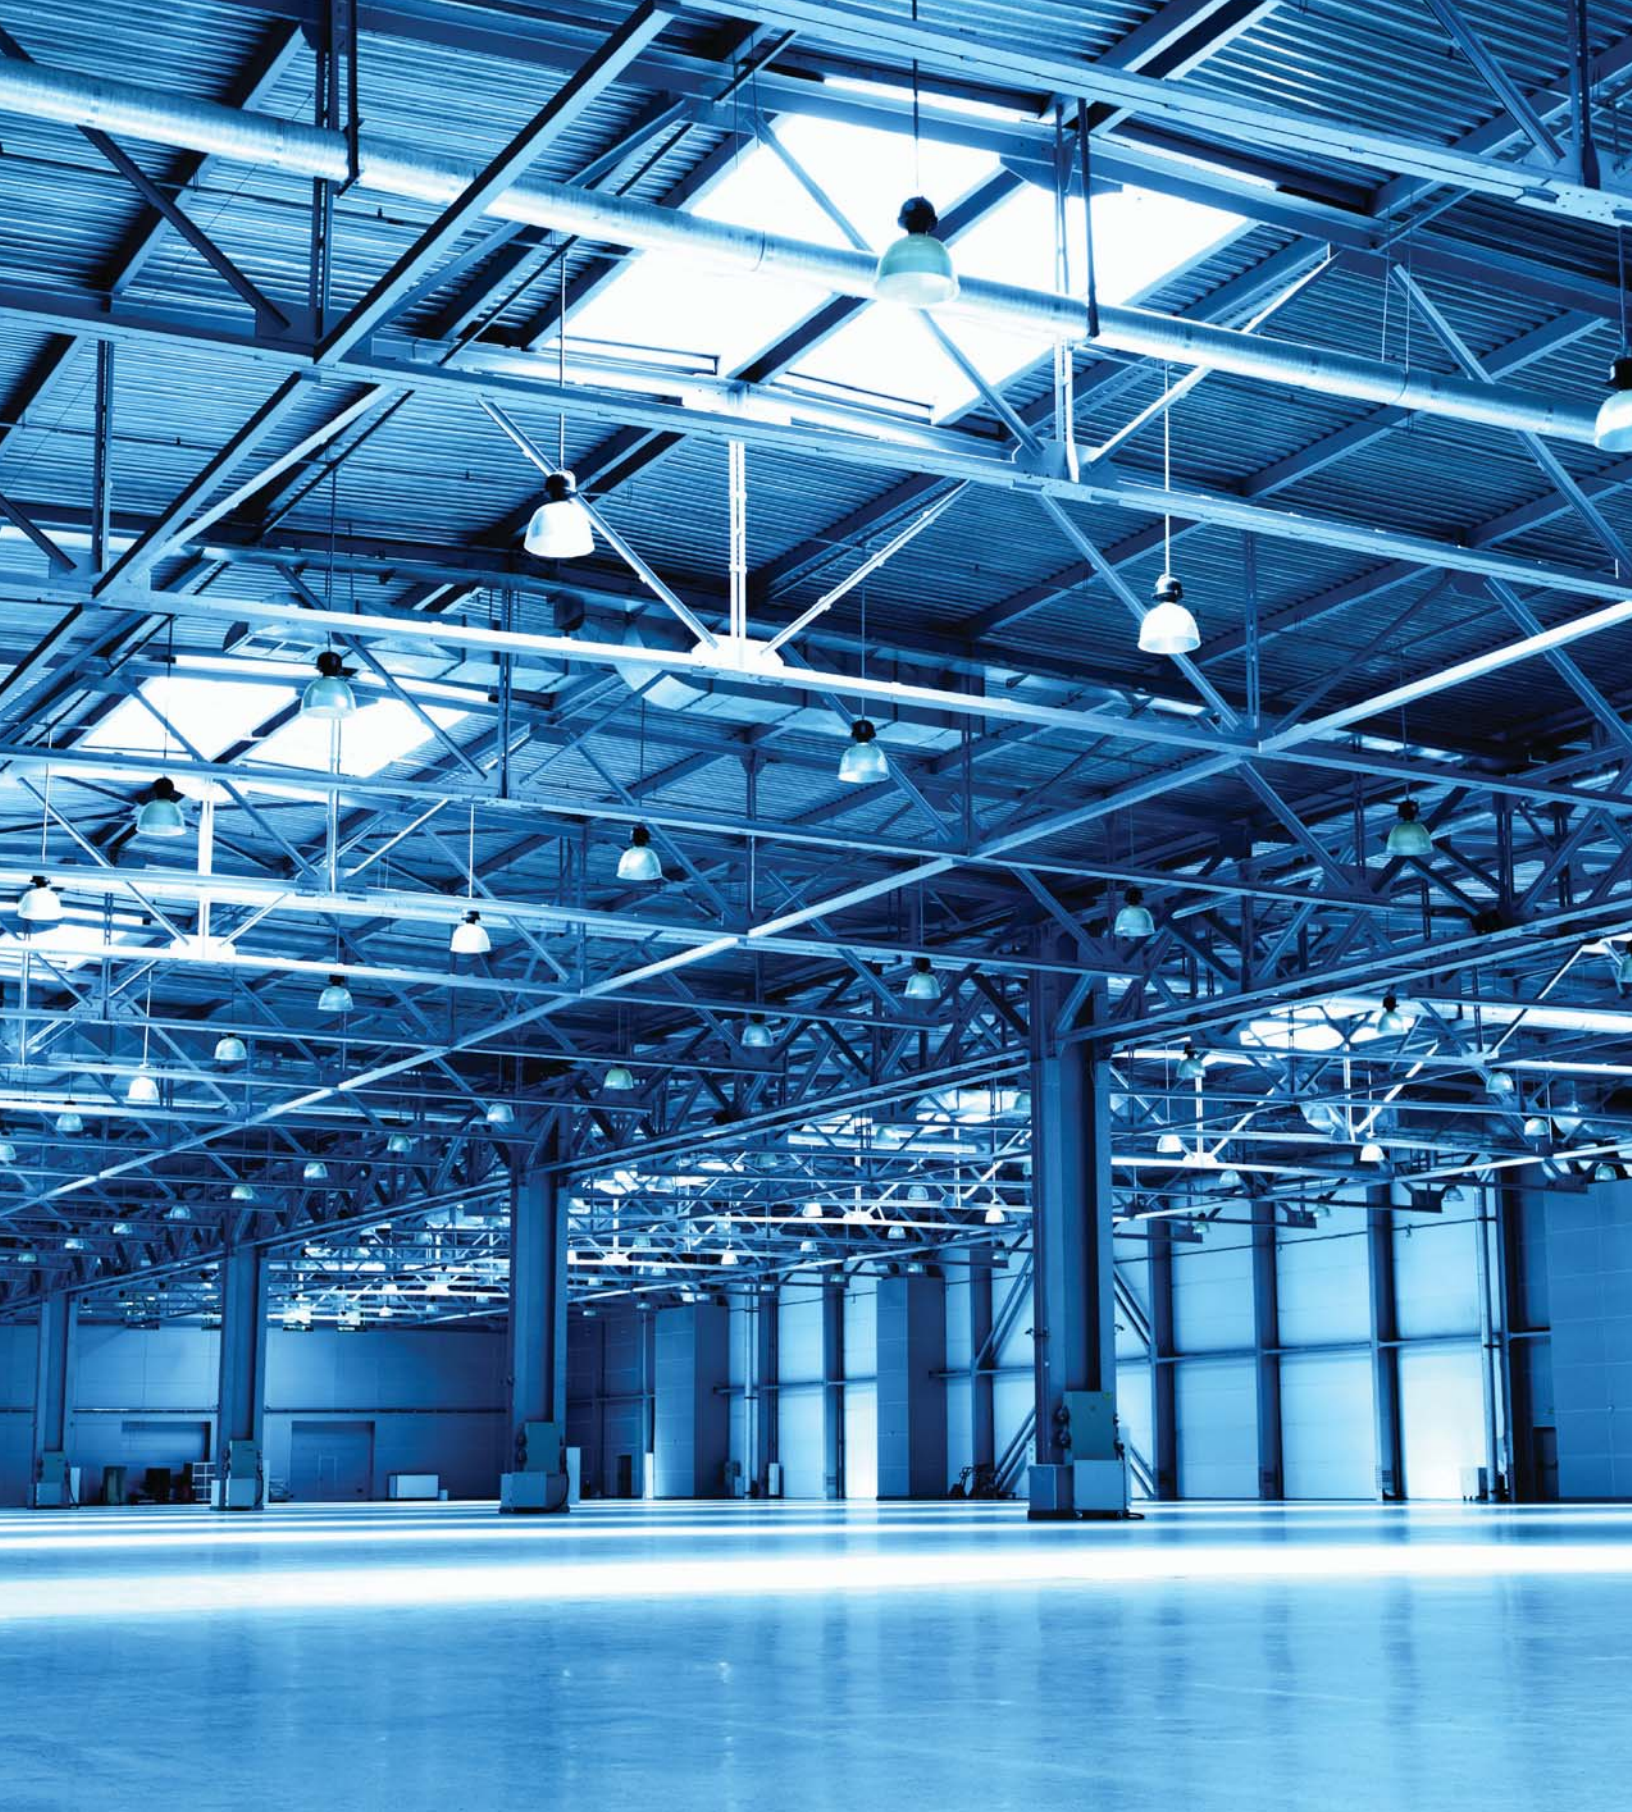

**MSC** will seam matting together to make all sorts of functional configurations.
