

MINIMIZE THE IMPACT OF DANGEROUS SPILLS

SPILL CONTROL SOLUTIONS

PREPARE FOR TOTAL CONTROL

PRO-SAFE® provides solutions to help you protect your employees and the environment in case of a dangerous spill. Our spill control products can help you respond quickly and effectively when disaster strikes, often helping limit equipment down time. Being prepared to act responsibly in a time of danger can help minimize the impact to your reputation and financial performance.

PROTECT YOUR EMPLOYEES & YOUR BUSINESS

When you're working with fluids, there's always the chance of spill. PRO-SAFE® spill control solutions keep you prepared with a range of products that can not only help you protect your employees and the environment, but also help you comply with EPA and OSHA regulations. We offer absorbents, pads, safety cabinets and more, all designed to help you clean spills quickly and effectively.

WHAT IS AN EMERGENCY SPILL?

Under the wrong circumstances, any spill can be considered an emergency.

OSHA defines an emergency spill as:

- One in which there are high levels harmful substances that could injure workers
- One that could cause a fire or explosion
- One that significantly impacts air quality in the facility
- One that requires workers evacuating the area

SPILL-SPECIFIC SOLUTIONS

Whether you're dealing with water-based, oil-based or hazardous chemical spills, PRO-SAFE® has the right solutions. This brochure is divided into sections by spill type, so it's easy to find just what you need. See the Spill Control Recommendations chart to learn more.

PREPARE FOR YOUR PROCESSES

The key to fast, effective spill control is making sure you have the supplies, resources and protocol designed to fit the unique needs of your facility.

Here are PRO-SAFE® recommendations for a variety of applications:

General Purpose Wiping, Drips and Leaks: pads and rolls for use throughout your facility, as well as socks and pillows to soak up spills around and under dripping equipment.

Heavy Foot & Forklift Traffic: mats and rug mats to help minimize the risk of slips, trips and falls.

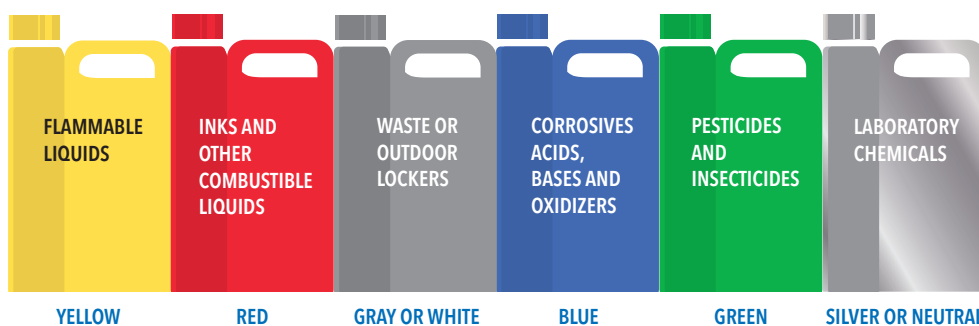

Emergency Spill Response: spill kits, which contain all the gear to tackle unexpected spills.

SPILL CONTROL RECOMMENDATIONS		
TYPE OF SPILL	TYPE OF SORBENTS	APPLICATIONS
<ul style="list-style-type: none"> • Water-based fluids • Oil-based fluids 	Universal Absorbents	Use around machinery, under leaky pipes, in messy traffic area or for general maintenance areas.
<ul style="list-style-type: none"> • Oil-based fluids • Outdoor/water repelling 	Oil Only Absorbents	Specialized for oil and other petroleum-based spills including paints and non-water soluble chemicals, these absorbents will not absorb water and will float indefinitely.
<ul style="list-style-type: none"> • Hazardous chemical fluids 	Chemical Absorbents	Surfactant-treated polypropylene absorbents can be used on a wide range of chemicals, including hydrofluoric acid. They are chemically inert and will not react with aggressive fluids.

COLOR YOUR CABINETS

Be sure hazardous materials are protected in flammable safety cabinets to prevent accidental fires, explosions, chemical burns or other damage. Color coding flammable safety cabinets helps easily identify contents at a glance, which makes this solution a best practice in many facilities.

BEST MANAGEMENT PRACTICES FOR FLAMMABLE SAFETY CABINET COLOR

UNIVERSAL SORBENTS

BE PREPARED WITH THE RIGHT MIX FOR OIL & WATER SPILLS

All-purpose absorbents are the go-to solution for indoor spill control. They tackle a variety of spills, both in high-traffic areas, around machinery and under leaky pipes or fittings. These versatile products clean up oils, coolants, solvents and water-based fluids, and are available in a variety of weights, cover stocks and finishings to suit your unique needs.

Applications

- Wiping tool
- Small spills
- Under leaky pipes
- Around liquid storage containers
- Around machinery
- In messy traffic areas
- Under dripping valves
- General purpose

UNIVERSAL SORBENTS

CAMOUFLAGE ROLLS, BARRIER SPILL MATS, INDUSTRIAL RUGS, HIGH TRAFFIC ROLLS & UNIVERSAL ACCESSORIES

Camouflage Rolls - Unique 3-ply construction and camouflage pattern, are tough enough to take whatever you dish out. These soak up oil, water, coolants, solvents, acids and bases.

Barrier Spill Matting - Made of needlepunched polypropylene fibers, these sorbents are designed with a unique 3-ply construction that prevents fluids from penetrating to the floor and provide the best nonslip surface available. They absorb oil, water, and chemicals. As further assurance of worker safety, they also resist curling and buckling.

Industrial Rugs - Made of needlepunched polypropylene fibers, these sorbent absorbs 10 to 12 times their weight in oil, water or chemicals, prevent slippery areas and eliminate unsightly tracking between plant and office. Can stand up to the most aggressive chemicals.

Fire Retardant Industrial Rugs - Made of flame retardant needle-punched polypropylene fibers, these sorbents provide a non-slip surface that is ideal for busy aisles and walkways next to leaky machinery. Absorbs 10 to 12 times its weight in oil, water, or chemicals and is a must for all spill contractors in decontamination units.

Rag Rugs - A universal sorbent that provides good footing, masks dirt and absorbs spills in maintenance, repair and industrial environments. Rag Rug is a blue-gray, nonwoven mat made of recycled cotton and polyester, with a latex binder on one side. Used to soak up oil, water-based and solvent-based liquids.

High Traffic Rolls - Built for absorbency, these economical sorbents are ideal for your busy problem areas. The universal sorbents are tough enough for forklift traffic.

UNIVERSAL SORBENTS

UNIVERSAL EARTH-FRIENDLY SORBENTS

These sorbents are an economical substitute to polypropylene sorbents. Constructed from a single layer of fine point-binded natural fibers, they offer outstanding absorbency and durability.

- Perforated for easy and exact use

- Outperform melt-blown polypropylene sorbents by 40% (based on ASTM test standard 726)
- This unique new Earth-friendly technology utilizes fibers now made viable due to skyrocketing polypropylene costs

UNIVERSAL SORBENTS

ALL-PURPOSE SORBENTS

5861680A

The standard in all-purpose gray dimpled maintenance sorbents. Highly effective for cleanup and removal of oil and water-based liquids. A heavyweight, gray dimpled material combines thickness, strength, high absorbency and low linting. These sorbents are suitable for virtually any industrial application. Perforations contribute to economy by allowing the user to take

precisely the right amount of material to do the job. The dirt masking gray color fosters longer use before disposal. Incinerates to less than 0.02% ash.

- Absorbs oil, water-based liquids and chemicals, abrasion and chemical resistant, low linting and static resistant

OIL SORBENTS

MAKE SHORT WORK OF OIL SPILLS

Oil only absorbents help clean both oil- and petroleum-based spills in shops, manufacturing facilities, warehouses, loading docks and other situations. Great for cleaning around machinery, in storage areas and anywhere oil-based leaks occur. Choose the weight, cover stocks and finishes to handle your specific needs.

Applications

- Wiping tools
- Small spills
- Under leaky pipes
- Around machinery
- Storage containers
- Under dripping valves
- Other general purpose maintenance

CELLULOSE ROLL

ABSORBS OILS, FUELS
OR PETROLEUM
BASED LIQUIDS

WILL NOT ABSORB WATER
OR WATER BASED LIQUIDS

OIL SORBENTS

SOCKS & BOOMS

58616962

78267564

Bonded & Perforated Sorbents - are the contemporary way to handle cleanup and removal of oil where mechanical equipment is no longer economically useful. Convenient, lightweight and cost effective, they save time and money. Absorb solvents, solvent-based paints, vegetable oils and many more oil-based chemicals. Absorb 25 times their weight and are 1-ply.

Economy/Contractor Sorbents - are "contractor grade" oil sorbents ideal for environmental applications. They are comprised of the best available basic melt blown polypropylene. These sorbents are packed in distinctive green bags and are the obvious choice when you need low cost plus high performance sorbents. These sorbents are 1-ply.

Laminated Oil Only Sorbents - are the ultimate "wipe down" sorbent. Both are abrasion resistant and non-abrasive. In jobs where 121/2 Lbs. of clay is needed to soak up one gallon of oil, just 1/2 Lb. of this product does the job. The product is chemically inert and will not absorb water. These sorbents are 1-ply.

Low Lint/Fine Fiber Sorbents - feature 3-ply white dimpled pads and rolls, superior quality for industry. Perforated to permit the use of precisely the right amount of material, it's suitable for industrial and environmental applications. These sorbents are 3-ply.

Pads - Used in every application from major spills to routine drips and leaks. Wringable for reuse, dustless and unaffected by temperature changes. Incinerates to less than .02% ash

Rolls - For wide area coverage on land, water or in industrial plants. Can be easily cut-to-size to fit anywhere. Rolls out quickly for ease of handling anywhere.

Booms - Use on water to soak up and contain floating spills. Can be linked together to form any length. Lint-free and easy to handle even when saturated.

AIR-LAID PREMIUM SORBENTS - OIL ONLY

- Air-laid construction creates a consistent, extra strong, highly absorbent internal web structure
- Made up of two sonically welded layers from 85-90% recycled/sustainable polypropylene
- Top layer is made of durable spunbound polypropylene
- Base layer is low slip, making this a great product for foot traffic
- Low linting
- Fire retardant per ASTM 726

OIL SORBENTS

OIL ONLY EARTH-FRIENDLY SORBENTS

These sorbents are an economical substitute to polypropylene sorbents. Constructed from a single layer of fine point-binded natural fibers, they offer outstanding absorbency and durability.

- Perforated for easy and exact use

- Outperform melt-blown polypropylene sorbents by 40% (based on ASTM test standard 726)
- This unique new Earth-friendly technology utilizes fibers now made viable due to skyrocketing polypropylene costs

INDUSTRIAL GRADE FINE FIBER SORBENTS

- Available for oil only or universal applications
- This product is excellent where both appearance and absorbency is of concern
- Fine fiber sorbent pads are very clean, low lint and absorb over 25 times its own weight in liquids

- All rolls are perforated
- The tri-layer construction provides additional strength over traditional single layer sorbents, while holding firmly to the floor eliminating any slippage

CHEM-HAZ SORBENTS

GET THE RIGHT CHEMISTRY

Chemical-based fluids require special attention, and that starts with green and yellow chemical absorbents from PRO-SAFE®. Designed to be chemically inert, they don't react with aggressive fluids, in order to help safely and swiftly contain spills. Our selection includes a variety of weights, cover stocks and finishes to provide solutions for your facility's special needs. You can feel confident that you're wearing a safe and durable rain suit, no matter how wet it is outside.

Applications

- Anywhere hazardous chemicals may be present
- Bulk chemical storage containers
- Nuclear power plants
- Around liquid storage containers
- Laboratories
- Hospitals
- Pharmaceuticals
- Chemical manufacturing

CHEMICAL SORBENTS

- These are specially developed chemical sorbents with properties that make them ideal for hazardous liquid cleanup. A surfactant-treated polypropylene, they absorb 16 times their weight in chemicals, water or oil. Versatile and cost-effective, they can be used on a wide range of chemicals, including hydrofluoric acid. Their fast wicking actions minimize the problems of hazmat spills.
- They are chemically inert, so they will not react with aggressive fluids. They are certified by GTS Duratek and leaves on 0.20% ash. The product's green color - the universal symbol for safety - indicates that it is intended for use on hazardous materials.

SAFETY CABINETS

EXTINGUISH FLAMMABLE DANGERS

Keep employees safe from accidental fires and explosions by protecting flammable liquids in a flammable safety cabinet. Our FM-approved cabinets meet OSHA and NFPA guidelines for safety and protect dangerous liquids from ignition sources.

Do I Need Self-Closing Doors on My Flammable Cabinets?

If you live in a state or municipality that has adopted either NFPA 1 (Uniform Fire Code) 60.1.2.23(d) or IFC (International Fire Code) 5704.3.2.1.3, you must have self-closing doors.

LEAK DIVERTERS

CHANGE THE CHANNEL TO AVOID LEAK DAMAGE

Protect your employees and plant with PRO-SAFE® leak diverters. They install quickly to channel leaks, helping reduce the risk of slip and fall accidents, as well as preventing damage to floors, inventory and equipment. For overhead leaks, our roof leak diverter bucket kits provide grab-and-go convenience, and our pipe diverters catch drips from leaky pipes before they create bigger problems.

What do Leak Diverters do?

- Capture overhead leaks, big and small
- Keep fluid leaks off the floor
- Eliminate slip hazards, property damage and chemical exposure from leaks
- Allow fluids to be collected in a drum or tank to be disposed of properly
- Serve as a temporary fix until serious repairs can be made

COLLECTS DRIPS AND DIRECTS THEM TO THE DRAINAGE AREA

TOUGH, VINYL COATED

CONNECTS TO GARDEN HOSE

KNOW THE RULES

Be mindful of the regulations that apply to your particular type of business.

Here are just a few that apply to spill control:

29 CFR 1910.22(a)(2) – Walking-Working Surfaces The floor of every workroom shall be maintained in a clean and, so far as possible, a dry condition. Where wet processes are used, drainage shall be maintained, and false floors, platforms, mats, or other dry standing places should be provided where practicable.

40 CFR 112.7(c)(1)(viii) – General requirements for Spill Prevention, Control, and Countermeasure Plans Sorbent materials are included in the types of prevention systems that must be used for spill containment.

29 CFR 1910.120(j)(1)(vii) U.S. Department of Transportation specified salvage drums or containers and suitable quantities of proper absorbents shall be kept available and used in areas where spills, leaks, or ruptures may occur.
